# THE OAE

Three decades ago, a group of London musicians took a good look at that curious institution we call the Orchestra, and decided to start again from scratch.

They began by throwing out the rulebook. Put a single conductor in charge? No way. Specialise in repertoire of a particular era? Too restricting. Perfect a work and then move on? Too lazy. The Orchestra of the Age of Enlightenment was born.

Since then, the OAE has shocked, changed and mesmerised the music world. Residencies at the Southbank Centre and Glyndebourne haven't numbed its experimentalist bent. Record deals haven't ironed out its quirks. Period-specific instruments have become just one element of its quest for authenticity.

Today the OAE is cherished more than ever. It still pushes for change, and still stands for excellence, diversity and exploration. And thirty years on, there's still no orchestra in the world quite like it.

# LIFE OF THE SEA

## **Project Overview:**

Thank you for joining us in Life of the Sea. At the performance, you'll be taking on the role of THE STUDIO AUDIENCE on a chat show – Tonight with Adam Courting. The show will feature an actor, Adam and singer, Tim who will act and sing to tell the story of Tim's "discovery" of The Great Pacific Garbage patch. And woven into that story will be baroque songs and instrumental pieces played by the Orchestra of the Age of Enlightenment as well as brand new music performed by you, the audience.

## **Check-list:**

Before the show, you'll need to learn and rehearse:

1. Helly Shumray (we'll divide you into parts on the day)
2. Storm Instrumental (either Body Percussion or one of the instrumental parts)
3. Face the Facts (our short song + Makaton signs)
4. Tell the Truth (our longer song + Makaton signs)

## **Story Overview:**

A great maritime explorer is interviewed on a popular chat show to talk about his life at sea, and most importantly his new discovery: a hitherto unknown island in the middle of the Pacific Ocean. The explorer talks about his life at sea, and his scientific findings, but as he explains more about his findings far out in the middle of the Ocean, it becomes clear that what he assumed was a beautiful, exotic land mass, is nothing more than a man-made rubbish tip. Furious and humiliated, the explorer doesn't know where to turn, but with the encouragement of the interviewer and the audience, he vows to return and clean up the ocean.

## Life of the Sea – Creative Classroom Composition Ideas

### A message from James, the composer:

Here are three composition ideas that you could use in the classroom as an extension to the Life of the Sea project. If you record any of your creations, please share them with us – we'd love to see or hear what you come up with!

#### 1. Storm Instrumental

In the Life of the Sea concert, you'll be learning the body percussion or instrumental parts for the Storm so you can perform with the orchestra in the performance. Here's how to create your own storm piece using classroom percussion instruments.

a) Think about the different stages you might experience in a storm out at sea. In my piece, I used the following categories, but you might think of others:

- Calm Ocean
- The Wind Begins to Blow
- Thunder and Lightening
- The Eye of the Storm

b) Once you know which different sections you want to have, think about how you want to structure them. In my piece, I wanted the storm to build up from Calm Ocean to the Eye of the Storm and then I went symmetrically backwards until I got back to Calm Ocean. You could do the same, or you could end your piece with the massive storm. Or you could start in the middle of the storm and end calm. It's up to you!

c) Now you need to think about ways that you can conjure up the sounds of the storm on the instruments you have available. This is called making a Soundscape. Think about unusual ways of playing your instruments – using your fingernails to scratch on the drum or scraping a coin across a cymbal etc. You could work in small groups and give each group a section of the piece or work together as a whole class to make your decisions.

d) Once you've generated all of your material, it's time to start trying it out and joining it together. Decide whether you're going to have one person direct the piece or whether you're going to communicate as a whole group to work through your composition. However you do it, it's really important to work through the creative cycle a few times:

- Perform
- Reflect/Evaluate
- Modify
- Repeat

e) When you're making music in small or large groups, it's important to keep things as democratic as possible. Take regular votes to make sure that you're making choices that the majority like and approve of.

- f) I find it really useful to have a written, notated structure for the music I'm making. You could use words to describe your different sections and the sounds and music you're including in them. But you could also include pictures and shapes to help remind you (called a Graphic Score).
- g) And finally, make sure that you make space to perform your piece. Perhaps that will be to an audience within school. But it's equally valuable to make a film or audio recording of your piece. Having a performance outcome really helps to give a focus to the creative process.

## 2. Protest Chant & Body Percussion

My second creative suggestion is to create a protest chant. You will know how heavily you want to get into the discussion about the Climate Emergency but whether you're making a protest chant about picking up litter or about reducing your carbon footprint, there is a lot of creative potential in this activity.

- a) Divide the class into groups. Ask each group to generate their own protest chant. This could be as short and pithy as "There's no planet B". Or it could be more involved like "No more coal/No more oil/Keep your carbon in the soil!". Share these back to the whole class.
- b) Next, ask each group to find a rhythmic way of saying their chant. This could be quite natural or it could be a more unusual, even unnatural way of saying the sentence. Get the groups to perform these back to the whole class.
- c) Next, ask the groups to put their rhythms on their bodies. So for instance, you could have something like the following:

No more coal – hitting your knees  
No more oil – clapping  
Keep your – hitting knee  
Carbon – clapping  
In – Knee  
The – Clap  
Soil – Click

As the groups are working on their patterns, hit a woodblock or drum with a steady heartbeat so that all of the patterns share the same musical pulse.

- d) Listen back to all of the groups separately and then see what happens if you layer them up one by one until all the groups are doing their body percussion patterns at the same time.
- e) As a final extension, you could get the groups to put their body percussion onto classroom percussion instruments.
- f) Once you have all your ingredients, it's time to structure your piece. Ask the class how they want their piece to build up. Do you hear the groups one by one? Is there a drum heartbeat underneath? Do you want to hear both the body percussion AND instrumental versions in the same piece? How do you start? How do you finish?
- g) Again, make sure that you Perform – Evaluate – Modify – Repeat. And also find a way to perform your piece. Good luck!

### **3. Junk Percussion**

There are so many ways to turn rubbish into percussion instruments that you can use to make your own music. This link will take you to a page on the Music Mark website with links to come fantastic resources from Beat Goes On:

# FACE THE FACTS - LYRICS

Tim (spoken): What?

Anchor (spoken): It's a tip. A dump. A refuse collection centre in the middle of the ocean. It's trash!

Tim (spoken): What are you saying to me?

Anchor: I'm sorry that I have to break the news

Children: It's time to face the facts

Anchor: But your ground-breaking discovery is not a thing of beauty

Children: It's time to face the facts

Anchor: It's not a magic island – it's junk and litter

Children: It's a load of trash!

Tim: No! This can't be true! All my hard work...

Children: It's time to face the facts

Tim: I thought it was a new kind of paradise

Children: It's time to face the facts

Tim: But I must let go of that notion.

Children: It's time to face the facts

Tim: It's nothing but a stinking load of rubbish

Children: It's junk and litter, it's a load of trash!

Tim: Messing up the ocean, the ocean!
